

QUALIFICATIONS PACK - OCCUPATIONAL STANDARDS FOR LOGISTICS SECTOR

What are Occupational Standards(OS)?

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- OS are performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

Introduction

Qualifications Pack: Reefer Vehicle Operator

SECTOR: LOGISTICS

SUB-SECTOR: Cold Chain Logistics

OCCUPATION: Transportation

REFERENCE ID: LSC/Q8901

ALIGNED TO: NCO-2015/ NIL

Brief Job Description: The individual at work inspects, maintains and operates the reefer vehicle to the destination, monitors the temperature control logistics in transit by operating the required temperature monitoring device and ensuring a constant check on product safety in transit with respect to its quality, safety and temperature from origin to destination.

Personal Attributes: The job requires the individual to have: attention to details, good eye sight, arm-hand steadiness, ability to withstand changing temperature conditions, ability to sit for a long time, ability to lift weights, physical agility and stamina.

Standards (NOS)	6. LSC/N9901 Maintain food and personnel safety, health
	and hygiene in cold storage plant
	7. LSC/N9902 Communicate effectively with colleagues and
	clients
Performance Criteria	As described in the relevant OS units

Keywords /Terms	Description
Core Skills/Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the NOS, these include communication related skills that are applicable to most job roles.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of NOS.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
National Occupational Standards (NOS)	NOS are Occupational Standards which apply uniquely in the Indian context
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Organisational Context	Organisational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
Qualifications Pack(QP)	Qualifications Pack comprises the set of NOS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
Scope	Scope is the set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on the quality of performance required.
Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-Sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Sub-functions	Sub-functions are sub-activities essential to fulfil the achieving the objectives of the function.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.

Inspect the reefer unit

National Occupational Standard

Overview

This unit is about inspecting the reefer unit with respect to the various specifications and pre cooling the unit before loading products

Inspect the reefer unit

250/110/01	inspect the recter time
Unit Code	LSC/N8901
Unit Title (Task)	Inspect the reefer unit
Description	This OS unit is about inspecting the reefer unit with respect to the various specifications and pre cooling the unit before loading products
Scope	This unit/task covers the following: • Understand and allocate the work requirements
	 Understand the products and its requirements Conduct an inspection on the empty reefer before power on Inspect the reefer after power on Perform the pre cool operations of the unit Perform a final check to the reefer unit
	Range: Loading equipments such as hand trucks, forklift, conveyors, etc., usage of brakes, stepni, lights, petrol, accelerator, steering control, gear, etc, temperature requirements for each type of products and vehicle maintenance

Performance Criteria(PC) w.r.t. the Scope

Element	Performance Criteria
Understanding and	To be competent, the user/ individual must be able to:
allocating the work	PC1. take stock of the pending tasks/ shipments
requirements	PC2. conduct regular meetings to brief the work plan and responsibility allocations
	to the loaders and un-loaders
	PC3. allow access only to concerned people for loading and unloading
	PC4. communicate with concerned persons to coordinate the delivery orders
Understanding the	To be competent, the user/ individual must be able to:
products and its	PC5. be aware of the nature of product, type of packaging used, place of origin and
requirements	final destination
	PC6. know the quantity, weight and dimension of product like fruits, vegetables,
	meat, pharma and other perishable products
	PC7. understand the temperature required and other conditions of the reefer
	transport
Conducting an	To be competent, the user/ individual must be able to:
inspection on the	PC8. ensure the correct functioning of the cooling unit
empty reefer before	PC9. check the unit for physical damages
power on	PC10. check the technical unit functions of the reefer unit and the generator set
	according to the manufacturer and shipping specifications
	PC11. ensure the inside of unit is clean
	PC12. ensure the reefer machinery is running properly at correct settings
	PC13. check the refrigerant and lubricant level
	PC14. ensure the battery level is in range
	PC15. check the electric insulation value for compressor, motor and heaters
	PC16. supervise the cleaning of any spills or breakage in the reefer unit
	PC17. inspect the reefer for any leakage from roof, open spaces, etc.

LSC/N8901	Inspect the reefer unit

LSC/N8901	Inspect the reefer unit	
	PC18. inspect effectively the different parameters such as cleaning, disinfection and	
	temperature control of the reefer vehicle, loading equipments such as hand	
	trucks, forklift, conveyors, etc. and the pallets	
	PC19. ensure the interior surfaces of the vehicle are made of suitable materials	
	based on the type of product to be loaded	
Inspecting the reefer	To be competent, the user/individual must be able to:	
after power on	PC20. ensure no abnormal noises from the components	
	PC21. preset the temperature setting	
	PC22. ensure the cooling effects are in proper direction	
	PC23. calibrate the sensors and detect proper working of the unit	
Performing pre cool	To be competent, the user/ individual must be able to:	
operations of the unit	PC24. maintain the temperatures at pre cooled or pre set temperature level	
	PC25. set the reefer vehicle with the correct temperature for the respective	
	products	
	PC26. pre cool the reefers for the required amount of time before loading	
	PC27. ensure the environment conditions in the cold store and the reefer vehicle	
	are the same	
	PC28. avoid pre cooling in open environment resulting in condensation on the	
	reefer interior surfaces once the doors are opened	
	PC29. ensure the interior surface of the reefer container is cool to the desired	
	carrying temperature	
	PC30. keep the doors closed at all times except while performing the storage	
	operations	
Performing a final	To be competent, the user/individual must be able to:	
check to the reefer	PC31. check the conditions of the material handling equipment storage racks	
unit	PC32. ensure unit is odor free	
	PC33. ensure the system is in perfect condition	
	PC34. test the thermometer and cooling equipment before starting	
	PC35. ensure the reefer unit is ready to load products

Operate and drive the reefer vehicle safely

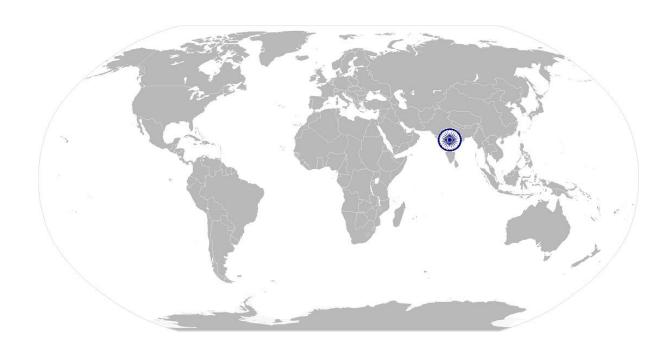

LSC/N8903

National Occupational

Standard

Overview

This unit is about operating and driving the reefer vehicle on the allocated routes to deliver the products at the specified destinations

LSC/N8903 Operate and drive the reefer vehicle safely

Unit Code	LSC/N8903
Unit Title (Task)	Operate and drive the reefer vehicle safely
Description	This OS unit is about operating and driving the reefer vehicle on the allocated routes to deliver the products at the specified destinations
Scope	This unit/task covers the following:
	 Understand the work requirements for delivery of perishable products by reefer vehicle Inspect and ensure the various trip parameters Drive the reefer vehicle safely on the allocated route Complete the trip activity
	Record and document the trip details and operation of reefer vehicle
	Range: Loading equipments such as hand trucks, forklift, conveyors, etc., usage of brakes, stepni, lights, petrol, accelerator, steering control, gear, etc, temperature requirements for each type of products and vehicle maintenance

Performance Criteria (PC) w.r.t. the Scope

Element	Performance Criteria
Understanding the work requirements for delivery of perishable products by reefer vehicle	To be competent, the user/ individual must be able to: PC1. understand the job requirements and the delivery schedules for the day PC2. understand the vehicle assigned and the type of goods PC3. check the delivery destinations and chart out routes in case of multiple destinations PC4. plan the trip and manage road time for delivery PC5. coordinate the time and location of delivery and be familiar with the nearby landmarks
Inspecting and ensuring the various trip parameters	To be competent, the user/ individual must be able to: PC6. carry all necessary papers while driving such as license, insurance and documents related to the goods carried such as order copy PC7. carry valid heavy duty driving license for refer vehicle preferably with ghat/hill driving permit PC8. inspect the vehicle condition before departure and check for brakes, stepney, lights, petrol, etc. as required PC9. intimate the customers on the time of arrival PC10. ensure the vehicle is not over loaded PC11. be familiar with the quantity of goods to be delivered PC12. be updated with the delivery details and traffic management plan PC13. ensure the doors are locked PC14. ensure the other parameters related to temperature within the vehicle, vehicle location monitoring, etc. PC15. be aware of the refrigerator temperature sensor, refrigerator operator sensor, fuel level sensor in refrigerator fuel tank, external temperature

LSC/N8903	Operate and drive the reefer vehicle safely
	sensor, etc.
Driving the reefer vehicle safely on the allocated route	To be competent, the user/ individual must be able to: PC16. ensure effective driving techniques and adherence to speed policies PC17. take adequate rest before driving to avoid accidents on the road and cause loss of men and material PC18. follow the assigned routes and minimize off route distances if any PC19. fasten seat belt while driving PC20. drive smoothly and at the correct speed using the accelerator, steering control, gear, etc. properly PC21. ensure conformance to traffic regulations PC22. keep updated of the up to date changes in traffic regulations PC23. ensure to be medically fit while driving PC24. take appropriate safety measures while driving such as avoiding alcohol, no usage of cell phones, etc. while driving
Completing the trip activity	PC25. perform a post trip check on the vehicle To be competent, the user/ individual must be able to: PC26. ensure to comply to the delivery timing committed with the customers PC27. collect the payment as specified from the delivery destination PC28. get the credit note signed if any PC29. obtain the delivery acknowledgement as required from the customers PC30. provide bills or receipts to the customers
Recording and documenting the trip details and operation of reefer vehicle	To be competent, the user/ individual must be able to: PC31. maintain mileage and kilometer logs PC32. record the expenses and incomes during the trip PC33. document the bills or other documents obtained from the customers PC34. fill the trip sheet as to name, time, date, destination, goods delivered, etc.
Knowledge and Unders	tanding (K)

Supervise the load in transit for product safety

National Occupational Standard

Overview

This unit is about monitoring and supervising the product safety during transit with respect to temperature, quality, etc.

LSC/N8904 Supervise the load in transit for product safety

Unit Code	LSC/N8904			
Unit Title (Task)	Supervise the load for product safety in transit			
Description	This OS unit is about monitoring and supervising the product safety during transit with respect to temperature, quality, etc.			
Scope	This unit/task covers the following:			
	Monitor the temperature control logistics in transit			
	Operate the temperature monitoring device			
	Check constantly for the product safety in transit			
	Document the operation			
	Range: Loading equipments such as hand trucks, forklift, conveyors, etc., usage of			
	brakes, stepni, lights, petrol, accelerator, steering control, gear, etc, temperature			
	requirements for each type of products and vehicle maintenance			

Performance Criteria(PC) w.r.t. the Scope

Element	Performance Criteria			
Monitoring the	To be competent, the user/ individual must be able to:			
temperature control	PC1. make sure the circulation of temperature controlled air is throughout the			
logistics in transit	entire load while transporting chilled products such as fruit, vegetables, pharma, dairy, etc. PC2. ensure the internal air circulation is constantly maintained inside the reefer vehicle PC3. use a generator back up to supply power in case of long transit time PC4. place the container on power for few hours before the transit, in case of non			
	availability of generator so that ambient air accumulated inside the container during loading is expelled PC5. take into account the nature of the product, local conditions and any seasonal variations			
On a ration at his	To be competent, the user/ individual must be able to:			
Operating the	PC6. monitor and meet the temperature device operation and optimum			
temperature monitoring device	temperature compliance PC7. ensure to manage the temperature in multiple zones			
	PC8. calibrate the temperature and humidity monitoring devices such as data loggers at predetermined intervals			
	PC9. equip the vehicle with an on board electronic temperature monitoring device			
	PC10. check for the label clearly stated and affixed on the products with controlled storage conditions such as "Time and Temperature sensitive" or "Do not Freeze", etc.			
	PC11. use the temperature indicators only when appropriate to monitor the products during shipment			
	PC12. ensure the temperature check devices are in working conditions in case of automatic devices

Skills (S)					
A. Core Skills/	Reading Skills				
Generic Skills	The user/ individual on the job needs to know and understand how to:				
	SA1. read instructions on temperature requirements for various products				
	SA2. read the operation manual of temperature operating device				
	SA3. read the job sheet for product safety maintenance				
	Writing Skills				
	The user/individual on the job needs to know and understand how to:				
	SA4. document the product quality at the time of unloading				
	SA5. report the product and temperature conditions during transit Oral Communication (Listening and Speaking skills)				
	The user/ individual on the job needs to know and understand how to: SA1. interface effectively with internal team across departments				
	SA2. communicate with the loaders and unloaders to carry out their respective				
	activities as per requirement				
B. Professional Skills					
	The user/ individual on the job needs to know and understand how to:				
	SB1. take decision on appropriate temperature for the respective type of goods				
	SB2. take decision on appropriate time to use the temperature monitoring device				
	Plan and Organize				
	Plan and Organize				
	The user/ individual on the job needs to know and understand: SB3. plan the effective ways of product inspection during transit				

Supervise the load in transit for product safety

SB4.	organize the controlled storage conditions of the respective products
Custon	ner Centricity

The user/individual on the job needs to know and understand:

SB5. maintain quality and vehicle hygienic conditions expected by customers

Problem Solving

The user/individual on the job needs to know and understand how to:

- SB6. resolve basic problems with the products damaged during transit
- SB7. take action in case of any variations in the storage and environment conditions

Analytical Thinking

The user/individual on the job needs to know and understand how to:

- SB8. assess the appropriate time to inspect the temperature and environment conditions
- SB9. assess whether the product meets the required quality specification during transit

Critical Thinking

The user/individual on the job needs to know and understand how to:

- SB10. spot process disruptions and delays
- SB11. monitor the temperature with appropriate device

Supervise the load in transit for product safety

Maintain the reefer vehicle

National Occupational Standard

Overview

This unit is about performing regular maintenance, service and repair of reefer vehicle and documenting the activities

Maintain the reefer vehicle

Lisc/10505 Ivianitani the recter venicle				
Unit Code	LSC/N8905			
Unit Title	Maintain the reefer vehicle			
(Task)				
Description	This OS unit is about performing regular maintenance, service and repair of reefer vehicle and documenting the activities			
Scope	This unit/task covers the following:			
33060	This unity task covers the following.			
	Perform vehicle maintenance activities in transit and in general			
	Carry out vehicle service and repair			
	Document and report the activities			
	bocument and report the activities			
	Range: Loading equipments such as hand trucks, forklift, conveyors, etc., usage of			
	brakes, stepni, lights, petrol, accelerator, steering control, gear, etc, temperature			
	requirements for each type of products and vehicle maintenance			
	requirements for each type of products and vehicle maintenance			
Performance Criteria(F	PC) w.r.t. the Scope			
Element	Performance Criteria			
Performing vehicle	To be competent, the user/ individual must be able to:			
maintenance	PC1. review the job card and understand the work to be carried out			
activities in transit	PC2. understand the manufacturer specifications related to the vehicle			
	PC3. clean and organize the workshop before the activity			
and in general	PC4. place the tools required for the service and maintenance			
	PC5. ensure correct materials or tools are used			
	PC6. mix solutions or other compounds for the activity			
	PC7. ensure the vehicle is placed on a suitable platform to begin service and			
	maintenance activity			
	PC8. ensure the residues of previous cargo has been removed before loading the next batch			
	PC9. ensure timely maintenance is carried out of the devices and vehicle by			
	calibration and adjustments as required			
	PC10. ensure the components and vehicle are clean and conditioned			
	PC11. inspect the vehicle on regular basis for tyres, lights, body work, wheel fixings,			
	load, etc.			
	PC12. inspect the vehicle tyres in transit and fill air on regular basis			
	PC13. ensure the working condition of the temperature and fuel sensors in the			
	vehicle during transit			
	PC14. ensure smooth running of vehicles during transit			
	PC15. perform service and repairs as required during transit to these sensors and			
	any other vehicle parts			
	PC16. follow standard operating procedures for service and maintenance			
	PC17. manage time, materials and cost effectively			
Carrying out vehicle	To be competent, the user/ individual must be able to:			
service and repair	PC18. diagnose faults and service requirements of the vehicle			
on the second second	PC19. use the appropriate methodology for testing and diagnosis			
	PC20. conduct inspection of electrical and electronic systems in the vehicle			
	1			

Maintain the reefer vehicle

	PC21. resolve the system failures as the monitoring systems are crucial to comply to			
	the industry regulations			
	PC22. monitor minor component repair, oil change and lubrication			
	PC23. fit and balance the replaced and refitted parts			
	PC24. perform the emergency repairs such as changing tyres in case of puncture checking on light bulbs, etc.			
	PC25. ensure no damage is caused while service and repair			
	PC26. take the required precautions to avoid any damage to the vehicle			
	PC27. monitor the mechanical and electrical functioning of the vehicle			
	PC28. ensure to obtain the correct spare parts, lubricants, coolants, oils and grease as required			
	PC29. be aware of the various machines and tools used for emergency repair and maintenance			
	PC30. ensure to keep the work area clean and tidy			
	PC31. verify the results of inspections and service with the vehicle specifications and			
	requirements			
Documenting and	To be competent, the user/ individual must be able to:			
reporting the	PC32. observe and document any malfunctions or repair in the vehicle			
activities	PC33. report to the concerned authority on any malfunctions or repair in the vehicle			
	or tools and equipments			
	PC34. record all the service and maintenance activities			
	PC35. documents the repair activities undertaken			
	PC36. provide all required details such as time, date of service and repair, activity			
	undertaken any malfunction etc			
Kanada dan and Hadan	undertaken, any malfunction, etc.

Maintain food and personnel safety, health and hygiene in cold storage plant

National Occupational Standard

Overview

This unit is about complying with safety, health and hygiene at the workplace to have a hazard-free environment and avoid downtime.

LSC/N9901 Maintain food and personnel safety, health and hygiene in cold storage plant

Unit Code	LSC/N9901
Unit Title	Maintain food and personnel safety, health and hygiene in cold storage plant
(Task)	
Description	This OS unit is about complying with safety, health and hygiene at the workplace to
	have a hazard-free environment and avoid downtime
Scope	This unit/task covers the following:
	Take precautionary measures to avoid work hazards
	Follow standard health, safety and hygiene procedures
Performance Criteria(PC) w.r.t. the Scope	
Element	Performance Criteria
Taking precautionary	To be competent, the user/ individual must be able to:
measures to avoid	PC1. assess the various health, safety and environmental hazards in the cold storage
work hazards	PC2. take necessary steps to eliminate or minimize the hazards
	PC3. analyze the causes of accidents at the workplace
	PC4. take preventive measures to avoid risk of cold burns and other injury due to
	contact with hot surfaces, gas, fire, hot fluids/ liquids, etc.
	PC5. ensure the employees have access to first aid kit when needed
	PC6. ensure to use personal protective equipment and safety gear such as gloves,
	jacket, footwear etc. for loading and unloading material in cold rooms to
	protect themselves from hypothermia, frostbite etc
	PC7. ensure to display safety signs at places where necessary for people to be
	cautious
	PC8. use rubber mats in the places where floors are constantly wet
	PC9. ensure electrical precautions such as insulated clothing, adequate equipment
	insulation, dry work area, switch off the power supply when not required, etc PC10. display emergency exit plan at prominent places and have emergency assembly
	area earmarked as a grid for easy counting of on duty associates and workers.
	PC11. unplug the control panel, compressor, condensor etc before performing
	maintenance
	PC12. report to the superior on any problems and hazards identified
	PC13. install fire alarms (electrical/manual) in cold store/deep freeze and keep other
	safety devices like hammer/mallet in the storage area
Following standard	To be competent, the user/individual must be able to:
health, safety and	PC14. maintain appropriate ventilation in the cold rooms to avoid unacceptable
hygiene procedures	accumulation of heat, condensation or odours
nygiene procedures	PC15. check and review the cold storage areas frequently
	PC16. stack items in an organized way and use safe lifting techniques to reduce risk
	of injuries from handling procedures at the storage areas
	PC17. ensure no sign of pest infestation and install rodent traps, fly glues and
	insectocutors wherever needed
	PC18. follow hygiene & sanitation standards of Government bodies like FSSAI, APEDA
	and /or EIA or importing countries like FAO, EU standards after PC 20

B. Techn	ical	The individual on the job needs to know and understand:
Know	edge	KB1. the purpose and usage of protective gears such as gloves , jackets etc. while working
		KB2. use of first aid at workplace
		KB3. cold storage order 1980
		KB4. food safety and standards act 2006
		KB5. reporting procedure or heirarchy for signs of damage and potential hazards
		KB6. methods to minimize accidental risks
		KB7. safe storage and handling of chemicals like refrigerants, ammonia, ethylene
		etc
		KB8. loading and unloading systems
		KB9. standard operating procedure for safety drills and equipment maintenance
		KB10. operation of machines: compressor, condensor, evaporator etc
		KB11. emergency procedures to be followed in case of an mishap such as fire,
		accidents, etc. and communication of safety instructions to subordinate
		staff
		KB12. emergency responses in case of malfunctioning of refrigeration equipment as
		a whole or its components like evaporator, condenser or compressor
		KB13. solid, liquid and gaseous waste disposal, treatment norms and equipment
		KB14. necessary action to be taken for the hazards identified
		KB15. knowledge of Quality systems like BRC, FSSAI, ISOFSSC, HACCP etc
Skills (S)		
A. Core S	kills/	Reading Skills
Gener	ic Skills	The user/individual on the job needs to know and understand how to:
		SA1. read and interpret the relevant organisation policies, procedures and
		diagrams that identify health, safety and safe environmental practices.
		SA2. read job sheets, company policy documents and information displayed at the
		workplace for health, safety and environment.
		SA3. read notes/comments from the senior
		Writing Skills
		The user/individual on the job needs to know and understand how to:
		SA4. fill up documentation related to health, safety and environmental standards,
		if required
		Oral Communication (Listening and Speaking skills)
		The user/individual on the job needs to know and understand how to:
		SA5. verbally report health, safety and environmental hazards and poor
		organisation practice.
		SA6. communicate to the supervisor about the work health, safety and
		environmental issues
		SA7. receive instructions from supervisor on minimizing the risks
		SA8. communicate with co-workers about the precautions to be taken for hazards
		free work
B. Profes	sional Skills	Decision Making

LSC/N9901 Maintain food and personnel safety, health and hygiene in cold storage plant

The user/individual on the job needs to know and understand how to: take preventive measures for the identified hazards SB2. select appropriate hand tools and personal protection equipment SB3. identify first aid needs in case of an injury **Plan and Organize** The user/individual on the job needs to know and understand how to: SB4. formalize and display evacuation plan at strategic locations **Customer Centricity** The user/individual on the job needs to know and understand how to: ensure targeted product delivery by practicing stipulated standards of occupational health safety and environmental measures **Problem Solving** The user/individual on the job needs to know and understand how to: SB6. take care of personal and equipment protection SB7. identify the hazards and suggest possible solutions

Analytical Thinking

The user/individual on the job needs to know and understand how to:

SB8. use safety equipment such as fire extinguisher during fire accidents

SB9. store tools in a safe way

SB10. analyse the seriousness of the hazards

Critical Thinking

The user/individual on the job needs to know and understand how to:

SB11. evolve smooth workflow by avoiding hazards at workplace

SB12. evaluate and apply the possible solutions for the hazards, as necessary

Communicate effectively with colleagues and clients

National Occupational Standard

Overview

This unit is about coordinating and communicating effectively with seniors, colleagues and clients to achieve a smooth workflow.

Unit Code	LSC/N9902					
Unit Title (Task)	Communicate effectively with colleagues and clients					
Description	This OS unit is about coordinating and communicating effectively with seniors, colleagues and clients to achieve a smooth workflow					
Scope	This unit/task covers the following:					
	Interact with seniors					
	Communicate with colleagues					
	Communicate effectively with clients					
Performance Criteria(I	PC) w.r.t. the Scope					
Element	Performance Criteria					
Interacting with	To be competent, the user/ individual must be able to:					
seniors	PC1. understand the work output requirements, targets, performance indicators and					
	PC2. deliver quality work on time and report any anticipated reasons for delays					
	PC3. escalate unresolved problems or complaints to the relevant superior					
	PC4. communicate project progress proactively to the superior					
	PC5. receive feedback on work standard					
	PC6. document the completed work schedule and handover to the superior					
Communicating with	To be competent, the user/ individual must be able to:					
colleagues	PC7. exhibit trust, support and respect to all the colleagues in the workplace					
	PC8. aim to achieve hassle free cold chain operation PC9. help and assist colleagues with information and knowledge					
	PC10. seek assistance from the colleagues when required					
	PC11. identify the potential and existing conflicts with the colleagues and resolve					
	PC12. pass on essential information to other colleagues on timely basis					
	PC13. maintain the etiquette, use polite language, demonstrate responsible and					
	disciplined behaviors to the colleagues					
	PC14. interact with colleagues from different departments: ripening chamber, cold					
	storage, transport, packhouse etc to effectively carry out the work among the					
	team and understand the nature of their work					
	PC15. put team over individual goals and multi task or share work where necessary supporting the colleagues					
	PC16. highlight any errors of colleagues, help to rectify and ensure quality output					
	PC17. work with cooperation, coordination, communication and collaboration, with					
	shared goals and supporting each others performance					
Communicating	To be competent, the user/ individual must be able to:					
effectively with	PC18. ask relevant questions to the client and identify their needs					
clients	PC19. possess strong knowledge on market and cold chain operation					
	PC20. brief the client clearly on potential costs and challenges involved in the cold					
	chain industry PC21. communicate with the client in a polite, professional and friendly manner					
	PC22. build effective but impersonal relationship with the client					
	same cheatre are impersonal relationship with the cheft					

Knowledge and Unders	PC23. ensure the appropriate language and tone are used with clients PC24. listen actively and have a two way communication PC25. be sensitive to the gender, cultural and social differences such as modes of greeting, formality, etc. PC26. understand the client expectations correctly and provide the appropriate products and services PC27. understand the client dissatisfaction and address or escalate their complaints effectively PC28. maintain a positive, sensible and cooperative manner all time PC29. ensure to maintain a proper body language, dress code, gestures and etiquettes towards the client PC30. avoid interrupting the client while they talk PC31. ensure to avoid negative questions and statements to the client PC32. inform the client on any issues or problems before hand and also on the developments involving them PC33. ensure to respond back to the client immediately for their voice messages, emails, apps, etc. PC34. develop good rapport with the client and promote other products and services PC35. seek feedback from the client on their understanding to what was discussed PC36. explain the terms and conditions clearly
A. Organizational Context (Knowledge of the company / organization and its processes)	The individual on the job needs to know and understand: KA1. vision, mission and values of the company KA2. business and performance of the company KA3. company's policies on personnel management, effective team work at workplace KA4. company's HR policies KA5. company's reporting structure KA6. company's documentation policy KA7. company's customer profile KA8. occupational health and safety standards KA9. company's policy on business ethics and code of conduct
B. Technical Knowledge	The individual on the job needs to know and understand: KB1. methods for effective communication with various categories of people and the different departments in the organization KB2. significance of team coordination and productivity targets of the organisation how to record the job activity as required on various types of documents KB4. how to use computer or smartphone to communicate effectively and productively KB5. significance of helping colleagues with specific issues and problems KB6. importance of meeting quality and time standards as a team KB7. how to practice effective listening and talking KB8. effective use of voice tone and pitch for communication

	KDO how to domenativate othics and some dissipling to the dispite				
	KB9. how to demonstrate ethics and convey discipline to the clients				
	KB10. how to build effective working relationship with mutual trust and respect within the team				
	KB11. importance of dealing with grievances effectively and in time				
Skills (S)	KB11. Importance of dealing with grievances effectively and in time				
A. Core Skills/	Reading Skills				
Generic Skills	The user/ individual on the job needs to know and understand how to:				
	SA1. read job sheets, company policy documents and information displayed at the				
	workplace				
	SA2. read notes/comments from the senior				
	Writing Skills				
	The user/ individual on the job needs to know and understand how to:				
	SA3. fill up documentation pertaining to job requirement				
	Oral Communication (Listening and Speaking skills)				
	The user/individual on the job needs to know and understand how to:				
	SA4. interact with team members to work efficiently				
	SA5. communicate effectively with senior to achieve smooth workflow				
	SA6. communicate effectively with the clients to build a good rapport with them				
	SA7. use language that the client or colleague understands				
	SA8. use the communication systems of the company, e.g., telephone, fax, public				
	announcement systems				
	SA9. E-mail and use Internet for communicating				
	SA10. use of audio-visual aids to communicate complex issues				
B. Professional Skills	Decision Making				
	The user/ individual on the job needs to know and understand how to:				
	SB1. spot and communicate potential areas of disruptions to work process and				
	report the same				
	SB2. report to supervisor and deal with a colleague individually, depending on the				
	type of concern				
	Plan and Organize				
	The user/ individual on the job needs to know and understand how to:				
	SB3. plan communication strategy in order to avoid conflicts and work disruption				
	Customer Centricity				
	The user/ individual on the job needs to know and understand how to:				
	SB4. practice patient listening, careful talking and paraphrasing in order to avoid				
	misunderstanding				
	Problem Solving				
	The user/ individual on the job needs to know and understand how to:				
	SB5. coordinate with different departments and multi-task as necessary				
	SB6. contribute to quality of team work and achieve smooth workflow				
	SB7. share work load as required				
	SB8. delegate work in consultation with senior or as necessary instead of allowing				
	work to pile up				
	AA				

Analytical Thinking			
The user/ individual on the job needs to know and understand how to:			
SB9. resolve recurring inter-personal conflicts by clear and two-way dialogue			
Critical Thinking			
The user/ individual on the job needs to know and understand how to:			
SB10. improve work processes by interacting with others and adopting best			
practices

Nomenclature for QP and NOS

Qualifications Pack

Occupational Standard

The following acronyms/codes have been used in the nomenclature above:

Sub-sector	Range of Occupation numbers
Warehousing	1 to 9
Land Transportation	10 to 14
EXIM/ Freight	
Forwarding/ Customs Clearance	21 to 23
	15 to 20
Courier/Express	15 to 20
E-Commerce	24 to 30
Supply Chain	31 to 34
Port Terminals, ICD and CFS	35 to 41
Inland Waterways	42 to 46
Liquid Logistics	47 to 49
Air Cargo Operations	61 to 62
Rail Logistics	50 to 55
Cold Chain Logistics	86 to 94
Generic Occupations	95 to 99

Sequence	Description	Example
Three letters	Industry name	LSC
Slash	/	/
Next letter	Whether Q P or N OS	Q/N
Next two numbers	Occupation code	01
Next two numbers	OS number	01

CRITERIA FOR ASSESSMENT OF TRAINEES

Job Role Reefer Vehicle Operator

Qualification Pack LSC/Q8901

Sector Skill Council Logistics

Guidelines for Assessment

- 1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC
- 2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC
- 3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below)
- 4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria
- 5. To pass the Qualification Pack, every trainee should score a minimum of 70% in every NOS
- 6. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack

COMPULSORY NOS							
Total Marks :700				Marks /	Marks Allocation		
Assessment Outcomes	Assessi	ment Criteria for Outcomes	Total Marks	Out of	Theory	Skills Practical	
	PC1.	conduct regular meetings to brief the work plan and responsibility allocations to the loaders and un-loaders		4	1	3	
	PC2.	allow access only to concerned people for loading and unloading		3	0	3	
	PC3.	communicate with concerned persons to coordinate the delivery orders		3	1	2	
	PC4.	be aware of the nature of product, type of packaging used, place of origin and final destination		3	1	2	
	PC5.	know the quantity, weight and dimension of product like fruits, vegetables, meat, pharma and other perishable products		3	1	2	
	PC6.	understand the temperature required and other conditions of the reefer transport		3	1	2	
	PC7.	ensure the correct functioning of the cooling unit		3	1	2	

	<u> </u>		•	
PC8.	check the unit for physical damages	3	1	2
PC9.	check the technical unit functions of the reefer unit and the generator set according to the manufacturer and shipping specifications	3	1	2
PC10.	ensure the inside of unit is clean	3	1	2
PC11.	ensure the reefer machinery is running properly at correct settings	3	1	2
PC12.	check the refrigerant and lubricant level	3	1	2
PC13.	ensure the battery level is in range	3	1	2
PC14.	check the electric insulation value for compressor, motor and heaters	3	1	2
PC15.	supervise the cleaning of any spills or breakage in the reefer unit	3	1	2
PC16.	inspect the reefer for any leakage from roof, open spaces, etc.	3	1	2
PC17.	inspect effectively the different parameters such as cleaning, disinfection and temperature control of the reefer vehicle, loading equipment's such as hand trucks, forklift, conveyors, etc. and the pallets	3	1	2
PC18.	ensure the interior surfaces of the vehicle are made of suitable materials based on the type of product to be loaded	3	1	2
PC19.	ensure no abnormal noises from the components	3	1	2
PC20.	preset the temperature setting	2	0	2
PC21.	ensure the cooling effects are in proper direction	3	1	2
PC22.	calibrate the sensors and detect proper working of the unit	3	1	2
PC23.	maintain the temperatures at pre cooled or pre set temperature level	3	1	2
PC24.	set the reefer vehicle with the correct temperature for the respective products	3	1	2
PC25.	pre cool the reefers for the required amount of time before loading	3	1	2
PC26.	ensure the environment conditions in the cold store and the reefer vehicle are the same	3	1	2
PC27.	avoid pre cooling in open environment resulting in condensation on the reefer interior surfaces once the doors are opened	3	1	2

10/2	N . 5 . D . C
-	National
	Skill Development Corporation

	PC28.	ensure the interior surface of the reefer container is cool to the desired carrying temperature		3	1	2
	PC29.	keep the doors closed at all times except while performing the storage operations		2	0	2
	PC30.	check the conditions of the material handling equipment storage racks		3	1	2
	PC31.	ensure unit is odor free		2	0	2
	PC32.	ensure the system is in perfect condition		3	1	2
	PC33.	test the thermometer and cooling equipment before starting		3	1	2
	PC34.	ensure the reefer unit is ready to load products		3	1	2
				100	30	70
	PC1.	inspect the load before unloading begins		2	0	2
	PC2.	check the quality, quantity and condition of the unloaded goods against the bill		3	1	2
	PC3.	ensure the goods against the checklist to see if the order and the delivery matches		2	0	2
	PC4.	ensure the load has not moved positions and no damages caused during transit		2	0	2
	PC5.	assign spaces for loading and unloading activity to take place		3	1	2
LSC/N8902 Monitor the	PC6.	inform the concerned person on the loading and dispatch schedule		3	1	2
product loading and	PC7.	ensure the required protective gears are used by the workers	100	3	1	2
unloading operations	PC8.	instruct loaders to maximize space during loading		3	1	2
	PC9.	ensure proper spacing and air flow movement while loading		3	1	2
	PC10.	ensure the loading operation is carried out in a cold tunnel/controlled environment where the temperature of the reefer container and the cold store are the same		3	1	2
	PC11.	ensure the products are loaded within their designated compartments at their appropriate temperature and other requirements		3	1	2
	PC12.	ensure the products are loaded in convenience to the delivery schedule		3	1	2

 	Quantification of the open control				
PC13.	check for any special delivery instructions and plan		3	1	2
PC14.	be aware of the hazards present and				
	precautions to be taken in the delivery		3	1	2
	plan				
PC15.	monitor to assess, clean and disinfect		3	1	2
DC16	the unloading areas as per requirement	-			
PC16.	ensure the area of unloading is safe and suitable for the products with respect to				
	suitability of ground, stability, traffic		3	1	2
	management and other site conditions				
PC17.	check if it is safe to proceed unloading		2	1	2
	with the concerned person		3	1	2
PC18.	ensure unloading happens safely and		3	1	2
	timelines are met	-			_
PC19.	make sure to rectify and remove the		2	4	2
	load safely if the position is changed or any damage caused during transit		3	1	2
PC20.	ensure to move the unloading location				
1 020.	in this case to unload		2	0	2
PC21.	liason with the workers to understand				
	the unanticipated difficulties in		2	0	2
	unloading	_			
PC22.	ensure unstable loads do not fall to the		3	1	2
	ground	-			
PC23.	ensure the persons do not jump on and off the vehicle while unloading		3	1	2
PC24.	ensure the persons take proper	-			
1 024.	unloading access such as stairways,		3	1	2
	platform, etc.				
PC25.	do not drag the product off the vehicle		2	0	2
PC26.	ensure the concerned and skilled person				
	are only assigned the unloading		3	1	2
	operation in case of forklift or any		3	_	2
2027	specialized products	-

	Skill Development Corporation

	PC33.	ensure the products are maintained at appropriate temperature at the time of unloading		2	1	1
	PC34.	ensure to keep aside the extra goods that do not meet the requirement		2	1	1
	PC35.	replace the items from warehouse in case of any damaged or missing item		2	0	2
	PC36.	record the temperature readings and product condition while unloading		2	1	1
	PC37.	communicate any deviations to the concerned person		2	1	1
	PC38.	record the signs of spillage or damage also if any		2	1	1
	PC39.	prepare documentation with respect to bill of lading, order and delivery, inspection report on the condition of unloaded products, damage and returns, self inspection, etc.		2	1	1
				100	30	70
	PC1.	understand the job requirements and the delivery schedules for the day		4	1	3
	PC2.	understand the vehicle assigned and the type of goods		4	1	3
	PC3.	check the delivery destinations and chart out routes in case of multiple destinations		4	1	3
	PC4.	plan the trip and manage road time for delivery		4	1	3
LSC/N8903	PC5.	coordinate the time and location of delivery and be familiar with the nearby landmarks		3	1	2
Operate and drive the reefer vehicle safely	PC6.	carry all necessary papers while driving such as license, insurance and documents related to the goods carried such as order copy	100	3	1	2
	PC7.	carry valid heavy duty driving license for refer vehicle preferably with ghat/hill driving permit		3	1	2
	PC8.	inspect the vehicle condition before departure and check for brakes, stepney, lights, petrol, etc. as required		3	1	2
	PC9.	intimate the customers on the time of arrival		2	0	2
	PC10.	ensure the vehicle is not over loaded		3	1	2
	PC11.	be familiar with the quantity of goods to be delivered		3	1	2

PC12.	be updated with the delivery details and traffic management plan	3	1	2
PC13.	ensure the doors are locked	2	0	2
PC14.	ensure the other parameters related to temperature within the vehicle, vehicle location monitoring, etc.	3	1	2
PC15.	be aware of the refrigerator temperature sensor, refrigerator operator sensor, fuel level sensor in refrigerator fuel tank, external temperature	3	1	2
PC16.	ensure effective driving techniques and adherence to speed policies	3	1	2
PC17.	take adequate rest before driving to avoid accidents on the road and cause loss of men and material	3	1	2
PC18.	follow the assigned routes and minimize off route distances if any	3	1	2
PC19.	fasten seat belt while driving	2	0	2
PC20.	drive smoothly and at the correct speed using the accelerator, steering control, gear, etc. properly	3	1	2
PC21.	ensure conformance to traffic regulations	3	1	2
PC22.	keep updated of the up to date changes in traffic regulations	3	1	2
PC23.	ensure to be medically fit while driving	3	1	2
PC24.	take appropriate safety measures while driving such as avoiding alcohol, no usage of cell phones, etc. while driving	3	1	2
PC25.	perform a post trip check on the vehicle	3	1	2
PC26.	ensure to comply to the delivery timing committed with the customers	3	1	2
PC27.	collect the payment as specified from the delivery destination	1	0	1
PC28.	get the credit note signed if any	3	1	2
PC29.	obtain the delivery acknowledgement as required from the customers	3	1	2
PC30.	provide bills or receipts to the customers	2	1	1
PC31.	maintain mileage and kilometer logs	3	1	2
PC32.	record the expenses and incomes during the trip	3	1	2
PC33.	document the bills or other documents obtained from the customers	3	1	2

10/2	N . S . D . C
-	National
	Skill Development Corporation

	PC34.	fill the trip sheet as to name, time, date,		3	1	2
	+	destination, goods delivered, etc.				
1			_	100	30	70
	PC1.	make sure the circulation of temperature controlled air is throughout the entire load while transporting chilled products such as fruit, vegetables, pharma, dairy, etc.		4	1	3
	PC2.	ensure the internal air circulation is constantly maintained inside the reefer vehicle		4	1	3
	PC3.	use a generator back up to supply power in case of long transit time		4	1	3
	PC4.	place the container on power for few hours before the transit, in case of non availability of generator so that ambient air accumulated inside the container during loading is expelled		4	1	3
	PC5.	take into account the nature of the product, local conditions and any seasonal variations		4	1	3
	PC6.	monitor and meet the temperature device operation and optimum temperature compliance		4	1	3
LSC/N8904	PC7.	ensure to manage the temperature in multiple zones		4	1	3
Supervise the load in transit for product safety	PC8.	calibrate the temperature and humidity monitoring devices such as data loggers at predetermined intervals	100	4	1	3
Salety	PC9.	equip the vehicle with an on board electronic temperature monitoring device		3	1	2
	PC10.	check for the label clearly stated and affixed on the products with controlled storage conditions such as "Time and Temperature sensitive" or "Do not Freeze", etc.		3	1	2
	PC11.	use the temperature indicators only when appropriate to monitor the products during shipment		3	1	2
	PC12.	ensure the temperature check devices are in working conditions in case of automatic devices		3	1	2
	PC13.	monitor the products at every stage of the journey ensuring their correct functionality		3	1	2
	PC14.	ensure the prescribed temperatures are maintained and check the refrigeration units		3	1	2
	PC15.	ensure to provide fresh air ventilation or dehumidification where required		3	1	2

	PC16.	ensure the vehicles are equipped with alarms		3	1	2
	PC17.	ensure the cooling units are active throughout the journey including stops and rest		3	1	2
	PC18.	ensure not to use energy saving modes of the cooling unit		3	1	2
	PC19.	check the loading patterns for every commodity is maintained as per requirement		3	1	2
	PC20.	ensure sufficient spacing around and within the load		3	1	2
	PC21.	ensure the corners of the cartons are supported by pallet		3	1	2
	PC22.	check the cargo packaging to ensure quality and specifications of the product is maintained during transportation		3	1	2
	PC23.	ensure transit happens at the cooler climate (at nights) or with a generator or storage back up		3	1	2
	PC24.	do not operate the reefer machinery when container doors are open		3	1	2
	PC25.	avoid the entry of pests into the reefer transport		3	1	2
	PC26.	understand which solution best matches the needs to assess the safety of the products in transit		3	1	2
	PC27.	ensure necessary environment controls are in place for controlled storage conditions requirement		2	1	1
	PC28.	open the vehicle doors with the products only during loading and unloading	-	3	1	2
	PC29.	ensure the product freshness and quality is maintained		3	1	2
	PC30.	document the quality of products throughout the journey		2	1	1
	PC31.	identify which stage (s) of journey the documentation needs to be done		2	0	2
	PC32.	record the temperature conditions in transit		2	0	2
				100	30	70
LCC/NOOC	PC1.	review the job card and understand the work to be carried out		3	1	2
LSC/N8905 Maintain the reefer vehicle	PC2.	understand the manufacturer specifications related to the vehicle	100	3	1	2
	PC3.	clean and organize the workshop before the activity		3	1	2

PC4. place the tools required for the service and maintenance PC5. ensure correct materials or tools are used PC6. mix solutions or other compounds for the activity PC7. ensure the vehicle is placed on a suitable platform to begin service and maintenance activity PC8. ensure the residues of previous cargo has been removed before loading the next batch PC9. ensure timely maintenance is carried out of the devices and vehicle by calibration and adjustments as required PC10. ensure the components and vehicle are clean and conditioned PC11. Inspect the vehicle on regular basis for types, lights, body work, wheel fixings, load, etc. PC12. inspect the vehicle tyres in transit and fill air on regular basis PC13. ensure the working condition of the temperature and fuel sensors in the vehicle during transit PC14. ensure smooth running of vehicles during transit PC15. perform service and repairs as required during transit to these sensors and any other vehicle parts PC16. follow standard operating procedures for service and maintenance PC17. manage time, materials and cost effectively PC18. diagnose faults and service requirements of the vehicle PC19. use the appropriate methodology for testing and diagnosis PC20. conduct inspection of electrical and electronic systems in the vehicle PC21. resolve the system failures as the monitoring systems are crucial to comply to the industry regulations PC22. monitor minor component repair, oil change and lubrication PC23. fit and balance the replaced and refitted parts PC24. perform the emergency repairs such as
