

S. No.	NOS Details	Question	Option A	Option B	Option C	Option D	Answer	Marks
1	LSC/N3701.Perform cargo handling at ports	How does crane operator ensure safe cargo lifting at port terminal operations?	Load weight verification	Random crane movement	Unsecured lifting hooks	Unplanned cargo shift	A	7
2		What improves accuracy during cargo handling operations at port container terminals?	Uncontrolled lifting speed	Manual guessing method	Signal communication system	Disorganized crane use	C	7
3		Which action ensures safety while performing cargo handling at ICD facilities?	Standard lifting procedure	Free movement operation	Irregular crane control	Untrained handling method	A	8
4		What helps maintain efficiency in cargo handling at port container operations?	Random cargo placement	Coordinated team signals	Manual load estimation	Unplanned crane activity	B	8
5	LSC/N3702.Perform preventive and first-line maintenance of MHE at ports	How does crane operator perform preventive maintenance on material handling equipment effectively?	Overload continuous use	Fault ignored operation	Random inspection timing	Lubrication schedule follow	D	7
6		What ensures first line maintenance accuracy for port material handling equipment systems?	Daily checklist inspection	Broken part reuse	No service record	Random equipment use	A	7
7		Which action improves safety during preventive maintenance of port crane equipment?	Uncontrolled machine start	Safety lockout procedure	Ignored warning signals	Loose cable handling	B	8
8		What helps maintain efficiency in first line maintenance of MHE at ports?	Routine system inspection	Irregular repair work	Missing maintenance logs	Random machine operation	A	8
9	LSC/N3706.Operate Reach Stacker	How does crane operator safely operate reach stacker during container handling operations?	Ignored safety alarms	Random joystick use	Unbalanced lifting method	Load stability check	D	7
10		What ensures accurate reach stacker operation in port container stacking activities?	Uncontrolled speed driving	Proper alignment control	Faulty hydraulic use	Random container shift	B	7

11		Which action improves efficiency while operating reach stacker at port terminals?	Planned container movement	Irregular machine usage	No load verification	Manual guessing method	A	8
12		What helps maintain safety during reach stacker operation in ICD environments?	Loose container handling	Blind driving operation	Unsafe lifting practice	Visibility clearance check	D	8
13	LSC/N9904.Maintain integrity and ethics in operation	How does crane operator maintain integrity during port cargo handling operations daily?	Transparent reporting system	Hidden cargo movement	Unrecorded load transfer	Unauthorized crane use	A	10
14		What ensures ethical behavior while operating cranes at port terminal facilities?	Unauthorized shortcuts use	Personal profit actions	Safety compliance rules	Untracked operations method	C	10
15		Which action supports integrity in crane operations at CFS and ICD terminals?	Random reporting system	Verbal undocumented work	Manipulated load data	Accurate log recording	D	10
16		What helps maintain ethics during reach stacker and crane operations effectively?	Standard operating procedure	Unapproved task changes	Secret cargo handling	Faulty record keeping	A	10
17	LSC/N9905.Follow health, safety and security procedures.	How does crane operator ensure compliance with port safety and security procedures?	Unrestricted crane movement	PPE compliance usage	Ignored warning signals	Unsafe lifting practices	B	10
18		What improves safety during crane operations at port terminal and ICD sites?	Standard operating procedure	Random machine handling	Loose cable usage	Uncontrolled load shifting	A	10
19		Which action ensures security while operating cranes in port container terminals?	Unverified system entry	Shared operator login	Open crane access	Access control system	D	10
20		What helps prevent accidents during crane operation in CFS and port areas?	Emergency stop function	High speed override	Ignored safety alarms	Manual bypass operation	A	10

21	DGT/VSQ/N0102.Em ployability Skills (60 Hours)	Which employability skill improves communication between crane operator and port supervisors?	Machine repair skill	Manual lifting ability	Effective communication skills	Cargo stacking speed	C	5
22		What employability skill helps crane operator solve operational issues at port terminals?	Physical strength training	Problem solving ability	Random guessing method	Manual loading skill	B	5
23		Which skill supports safe and efficient crane operation in port environments?	Attention to detail	Irregular working habit	Unplanned task execution	Disorganized workflow method	A	5
24		What employability skill improves teamwork in CFS and ICD crane operations?	Uncoordinated task approach	Independent isolation work	Random communication style	Collaboration ability	D	5
25	LSC/N3703.Operate Rail Mounted Quay (RMQ) crane	How does crane operator ensure safe operation of rail mounted quay crane?	Load balance monitoring	Random crane movement	Unchecked signal use	Unstable lifting method	A	7
26		What improves efficiency during RMQ crane container handling at port terminals?	Uncontrolled hoisting speed	Manual guessing operation	Coordinated signal system	Disorganized container flow	C	7
27		Which action ensures accuracy while operating rail mounted quay crane systems?	Position alignment check	Free movement operation	Faulty control usage	Random load shift	A	8
28		What helps maintain safety during RMQ crane operations in port environment?	Loose container handling	Blind crane operation	Ignored safety alarms	Standard operating procedure	D	8
29	LSC/N3704.Operate Grab Ship Unloader (GSU) crane	How does crane operator ensure safe grab ship unloader operation at ports?	Load weight monitoring	Random grab movement	Uncontrolled unloading process	Ignored safety signals	A	7
30		What improves efficiency during GSU crane bulk cargo unloading operations effectively?	Disorganized grab handling	Manual guessing method	Coordinated control system	Unplanned discharge flow	C	7

31		Which action ensures accuracy while operating grab ship unloader crane system?	Precise grab positioning	Free swing operation	Faulty hydraulic use	Random cargo drop	A	8
32		What helps maintain safety during grab ship unloader crane operations daily?	Blind machine operation	Standard operating procedure	Ignored alarms system	Loose grab handling	B	8
33	LSC/N3705. Operate Rubber Tyre Gantry (RTG) crane	How does crane operator ensure safe operation of rubber tyre gantry crane?	Load stability check	Random crane movement	Ignored safety alarms	Uncontrolled lifting speed	A	7
34		What improves efficiency during RTG crane container stacking operations at ports?	Faulty signal use	Manual guessing method	Disorganized container flow	Coordinated stacking system	D	7
35		Which action ensures accuracy while operating rubber tyre gantry crane systems?	Position alignment control	Free driving operation	Random load shifting	Broken hydraulic use	A	8
36		What helps maintain safety during RTG crane operations in container yards?	Loose container handling	Blind crane operation	Standard operating procedure	Ignored warning signals	C	8
